DETAILED ACTION

Status of the Application

Claims 23-25, 27-28, 30-31 are pending.

Applicant's request for reconsideration and submission of references by Roberts et al. (J. Biol. Chem. 273(34):22059-22067, 1998), McCaman et al. J. Biol. Chem. 240(9):3513-3517, 1995), and Kai et al. (J. Biol. Chem. 272(39):24572-24578, 1997) in a communication filed on 3/24/2005 are acknowledged.

As indicated previously, the IDS filed on 6/21/2004 has been considered. This IDS is being submitted herein with the references in pages 2-3 initialed as requested.

Examiner's Amendment

1. An informal Examiner's amendment to the specification appears below. This amendment is to update the current status of prior applications in the first sentence of the specification (37 CFR 1.78).
2. Please enter the following amendments to the specification as follows:
3. In page 1, please replace lines 3-6 with the following paragraph:

The present application is a continuation-in-part application of U.S. Serial No. 09/731,872, filed December 7, 2000, now abandoned, which claims priority, under 35 USC § 119(e), to the US Provisional Patent Applications Serial No. 60/169,629 and 60/187,470 filed December, 8, 1999, and March, 6, 2000, respectively, the disclosures of which are incorporated herein by reference in their entireties.

Reasons for Allowance

4. The following is an Examiner's statement of reasons for allowance. Although no experimental evidence has been presented indicating that the polypeptide of SEQ ID NO: 399 is a phosphatidic acid phosphatase, and no information has been provided in regard to the biological

Art Unit: 1652

processes/diseases/disorders associated with the polypeptide of SEQ ID NO: 399, in view of (1) Applicant's assertion in paragraphs 1547-1549 (U.S. Publication No. 20030152921) indicating that the polypeptide of SEQ ID NO: 399 is a phosphatidic acid phosphatase which catalyzes the conversion of phosphatidic acid into diacylglycerol, (2) and Applicant's arguments (i) reiterating that the polypeptide of SEQ ID NO: 399 is a phosphatidic acid phosphatase which can be used to produce a useful compound, i.e. diacylglycerol, and (ii) indicating that assays to detect phosphatidic acid phosphatase activity are known in the art as well as substrates for phosphatidic acid phosphatases, the utility rejection previously applied is hereby withdrawn. Furthermore, the Examiner has found no teaching or suggestion in the prior art directed to the polypeptide of SEQ ID NO: 399. Therefore, claims 23-25, 27-28, 30-31 directed to the polypeptide of SEQ ID NO: 399 are allowable over the prior art of record.

Conclusion

5. Claims 23-25, 27-28, 30-31 are allowed.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
